Taking the Lead in Social Media Investigative Solutions

SmartStart investigations uses nearly 100 paid and unpaid sites, our investigators scour the web for four plus hours and develop results never before seen in the insurance industry. How we do it: Results from most search engines only provide surface web information, our e-Researchers know where to look in order to find a variety of information relative to your subject, past, present and future.

SmartStart Monitoring is:

SmartStart Monitoring is an extended online activity check that shows all changes to your subject's social media sites. Our e-Researchers constantly check for updates to determine current lifestyle, hobbies, activities and new information via their social media sites and report back on a weekly schedule. This type of "activity check" has never been available for such an extended period of time for such an affordable rate!
